

## Hydrant Flushing Information

---

Beginning September 3, 2012 and continuing to November 1, 2012 between the hours of 9:30 AM to 3:30 PM fire department personnel will be conducting fire hydrant flushing throughout the city weather permitting. During this activity residents may experience discoloration in their drinking water. This is due to iron deposits in the water main becoming dislodged during the flushing of the hydrants. This discoloration DOES NOT pose a health risk, however residents are encouraged to run water through the lowest fixture in your home until the discolored water become clear. Also please DO NOT do laundry during this period of discolored water. Please visit [Newtonma.gov](http://Newtonma.gov) for a list of areas and times of the fire hydrant flushing. However due to emergency calls and weather conditions, we can only specify the area that will be flushed and NOT any particular street on any given day.

Should residents have any questions or concerns please call the Utilities Division at 617-796-1640 between the hours of 7:00 AM and 3:00 PM or the Police Control Center at 617-796-2100 after business hours. Listed below are the locations and times that the hydrant flushing will be performed.

### Schedule

Monday	Newton Corner Newtonville Nonantum Upper Falls Newton Highlands Waban
Tuesday	Lower Falls Auburndale West Newton Newton Corner
Wednesday	Upper Falls Waban Newton Highlands Oak Hill Lower Falls Auburndale West Newton
